An old farmer when urged by an impatient dealer to buy a new binder, refused, saying he had no binder, and where does the binder come in anyway?

The republican politicians and other calamity howlers are having a hard time trying to make people believe that tariff is not a tax, with the price of woolen manufactures going down, and the price of living getting lower.

The new tariff law. Theory stands no show with experience and facts come up to combat it. Paduch Standard.

The Hartford Herald tells as follows what kind of tariff the people want: "Have you bought your fall clothing? Most probably you have not, but when you do, notice, if you please, how much higher a dollar goes toward providing for your wardrobe than it ever did before. A dealer here showed me a writer's book of samples for fall-made suits, and a comparison of the prices with those of the same goods last fall showed a reduction of from \$2 to \$10 per suit. It will yet come to pass in this country that comfortable clothing will not be longer a luxury for the rich, but may be enjoyed by the poor as well. Despite the terrible force of the protection power, the Democratic party has done much to bring about this desirable result, and the future will witness still further action in the same direction."

The Mayors of cities and towns, County Judges, Presidents of commercial organizations and agricultural associations throughout the State are asked to at once name representative delegates to attend a State Immigration Convention to be held in Louisville on the 24th inst. The railroads and steamboats, doing business in the State are taking an interest in the movement and have agreed to sell tickets to the convention and return for one fare. All delegates appointed and the convention are requested to send their names and address to the Secretary of the Board of Trade, Louisville, so that an able provision may be made for all.

Hickman Courier Supplement.

THE HICKMAN COURIER.

HICKMAN, KY.,

FRIDAY, : : : : OCT. 5, 1894.

JERRY SIMPSON seems to be confident of the eventual success of the People's party. He gives his opinion that the country "is going to the devil."

Gov. STONE of Missouri is to join in a joint debate with Mrs. Lease of Kansas. In preparing for the encounter the governor has had his mustache removed and his hair clipped close.

REPUBLICAN newspaper correspondents are making much ado over the threatened bolt of the Louisiana sugar men to the republican party. But there would be nothing surprising in such action. Capitalists always "bolt" to the republican party when they want class legislation, and they show good horse sense in doing it.

FROM a business point of view the calamity wail, which the Republican campaign managers have adopted as a party trade mark, is indefensible and much to be regretted, as it will unquestionably have the effect of retarding the growth of the business revival now beginning to be felt throughout the country; but from a partisan political point of view, it is a mighty good thing for the Democratic party, as it will convince the doubting voters that the men who are directing the Republican party prefer a continuance of the business stagnation for which they are primarily responsible to a revival of business which would be properly credited to the Democratic party, and will therefore be worth thousands of votes to the Democratic party from those who are too patriotic to support a party that is willing to talk down the business of the country for the purpose of trying to get the votes of thoughtless or ignorant people. A party that has no better argument to offer to get votes than the business misfortunes of the people for which it's own legislation was responsible, will be returned to power in any country, unless the people have much less sense than they are credited with having.

DEMOCRACY AND PROSPERITY.

One of the most prominent of St. Louis' wholesale hat dealers said yesterday in the hearing of The Republic's editorial staff: "Three months ago I thought the prospects for the future of the Democratic party were poor indeed. But since the passage of the tariff law I have changed my mind. My own firm is astonished to find that our business for August of this year is 83 per cent. greater than that of August of last year. So we are very much inclined to say, 'Three cheers for the Democratic party.'"

And this is the evidence that is daily developing in all parts of the country. The revival of business is simply unprecedented and it follows so closely upon the heels of Democratic legislation correcting the 30 years of adverse Republican legislation that it must inevitably insure to the credit of Democracy.

Moreover, it is a healthy and natural revival. It is a rebound from the depression and disaster which followed the billion dollar Congress and proves to the country that the Democratic party is peculiarly adapted to appreciate and foster the best interests of trade and industry.

It is the testimony of the merchants and manufacturers of St. Louis that Democracy has done more to restore prosperity in one year than the Republican party ever did in any period of its 30 years or in the whole 30 years.—St. Louis Republic.

—The Grayson Gazette cites the following instance of a curious infraction of law: "It is not generally known that it is unlawful to trade a revolver, and the case of Jack Nugent in court last week should prove a warning. He had secured a revolver, and being commanded by his father either to dispose of it, or he would destroy the weapon, the boy traded it off for an old brass watch. The evidence of the farmer and son made the case plain, and the lowest fine, \$50, imposed by the jury. It has been generally understood that dealers must have license to sell revolvers and pistols, but this case develops the fact that the law is not strictly enforced. Private individuals are selling or trading. As it is also dangerous to keep them, one of the safest plans for boys or men is to not buy them.
